VITALXI - VTO comparison record

Skill test: same garment, same reference - views checked side by side.

Purpose: show how PTM keeps one garment consistent across views (GARMENT_ID, PROPORTION_LOCK).

Method: SPECIFY > REFERENCE > CONSTRAIN > EXECUTE > VALIDATE > REVISE > RELEASE.

Page 2: front / back pass. Page 3: marked revision pass. Page 4: released detail view.

Checks: silhouette, embellishment placement, train length, colour, lighting continuity.

Status: internal test material. Not biometric verification, not a fit guarantee.

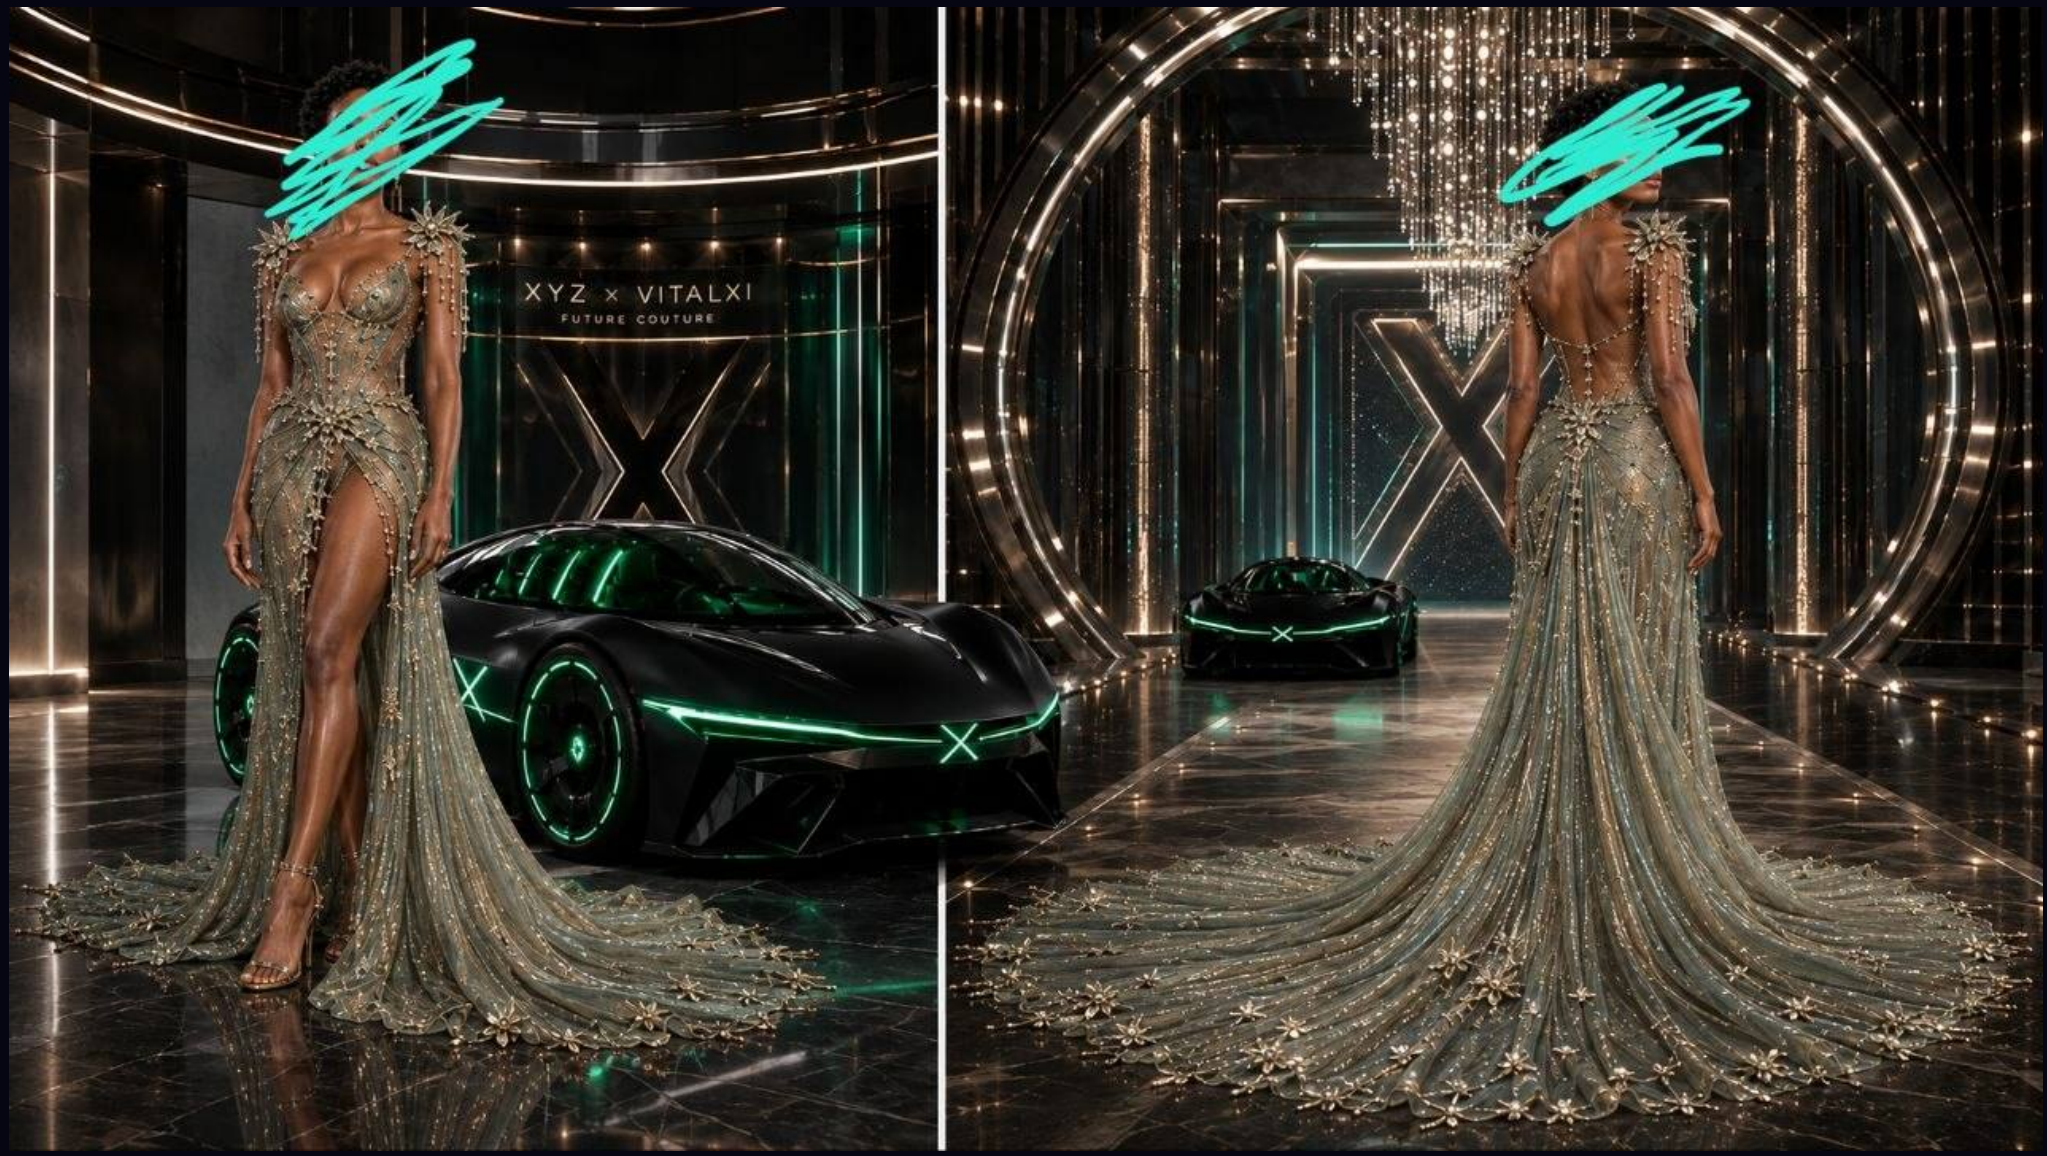

Pass 1 - front / back consistency

Reference set A: sage embellished gown, front and back.

Pass 2 - marked revision

Reviewer marks (green) flag areas sent back for REVISE.

Release - detail view

Approved hero output after validation.
